ASSIGNMENT-14.2

NAME:AKSHITHA
HT NO:2303A51360
BATCH NO:29

TASK-1:

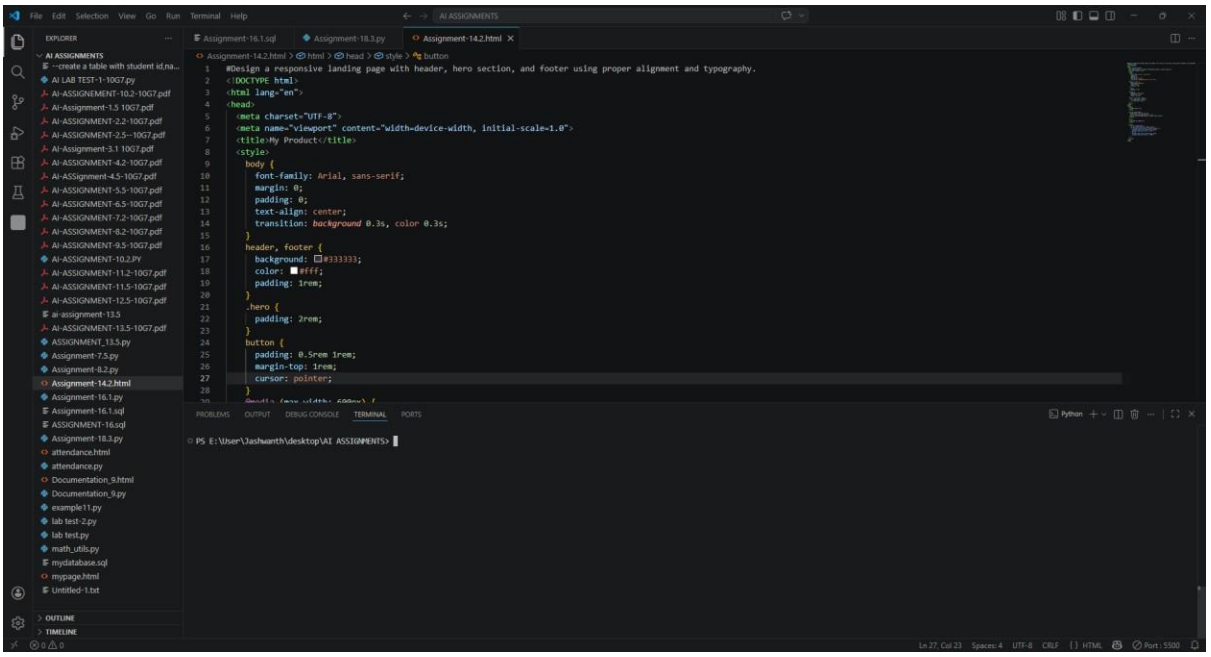
PROMPT:

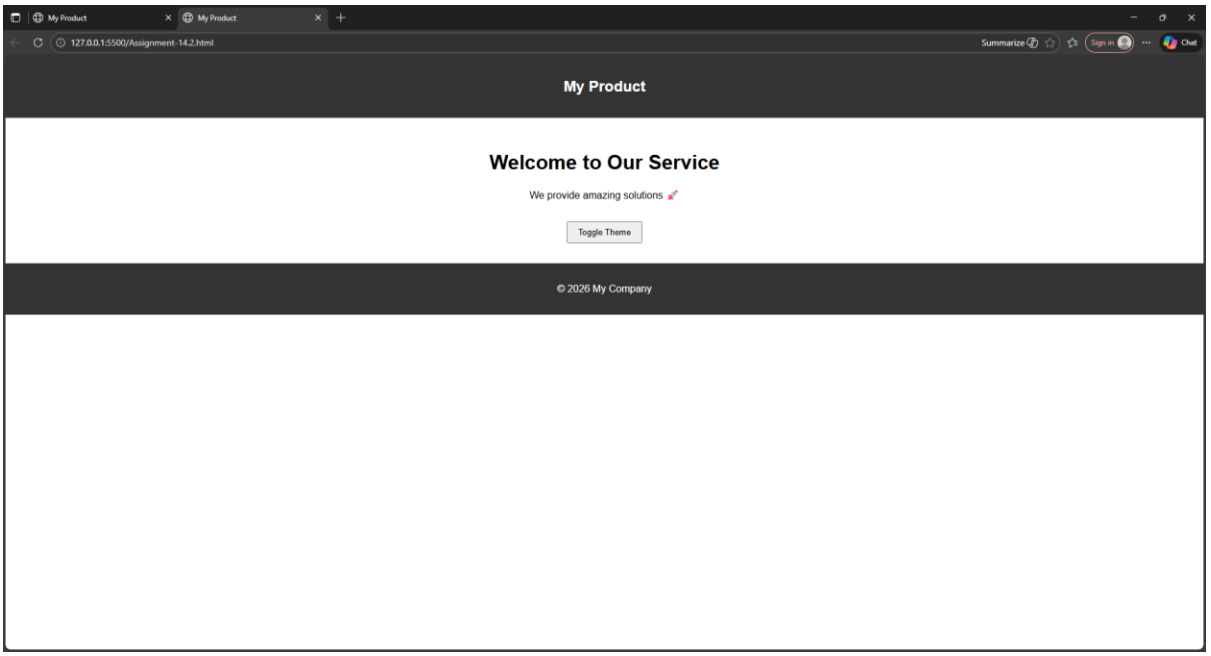
<!-- AI Prompt:

"Design a responsive landing page with header, hero section, and footer using proper alignment and typography."

-->

CODE:





OBSERVATION:

The page looks neat and well-structured with a header, hero section, and footer. It adjusts nicely on different devices, and the fonts make the text easy to read and pleasant to look at.

TASK-2:

PROMPT:

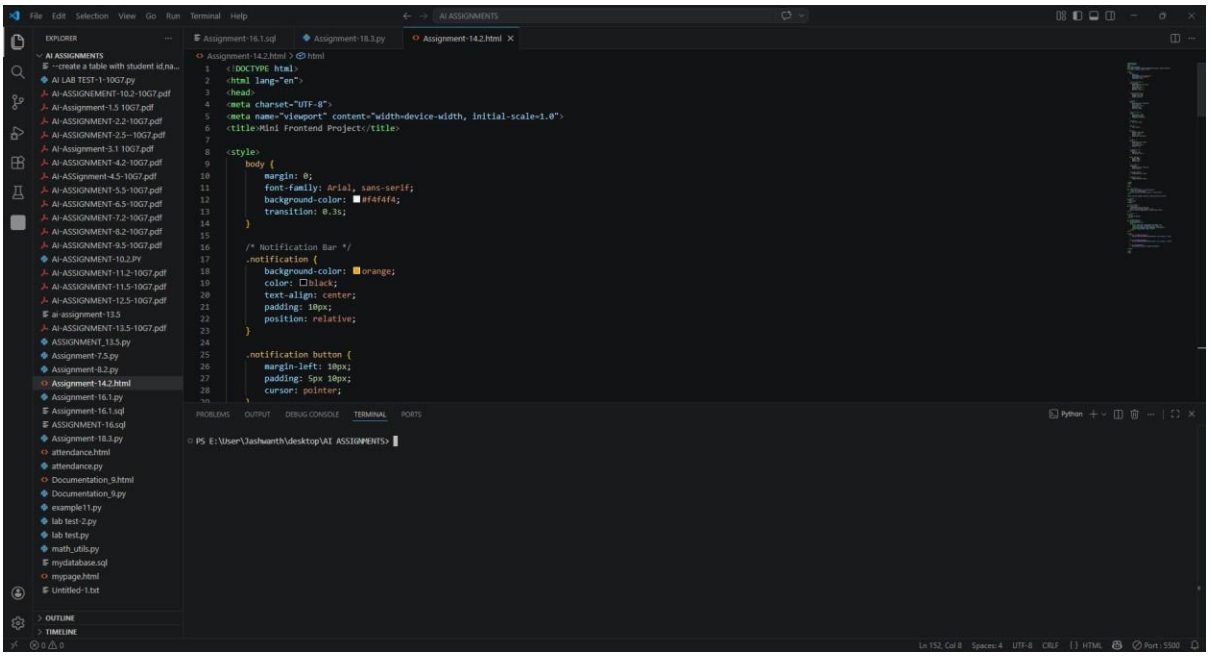
<!-- AI Prompt:

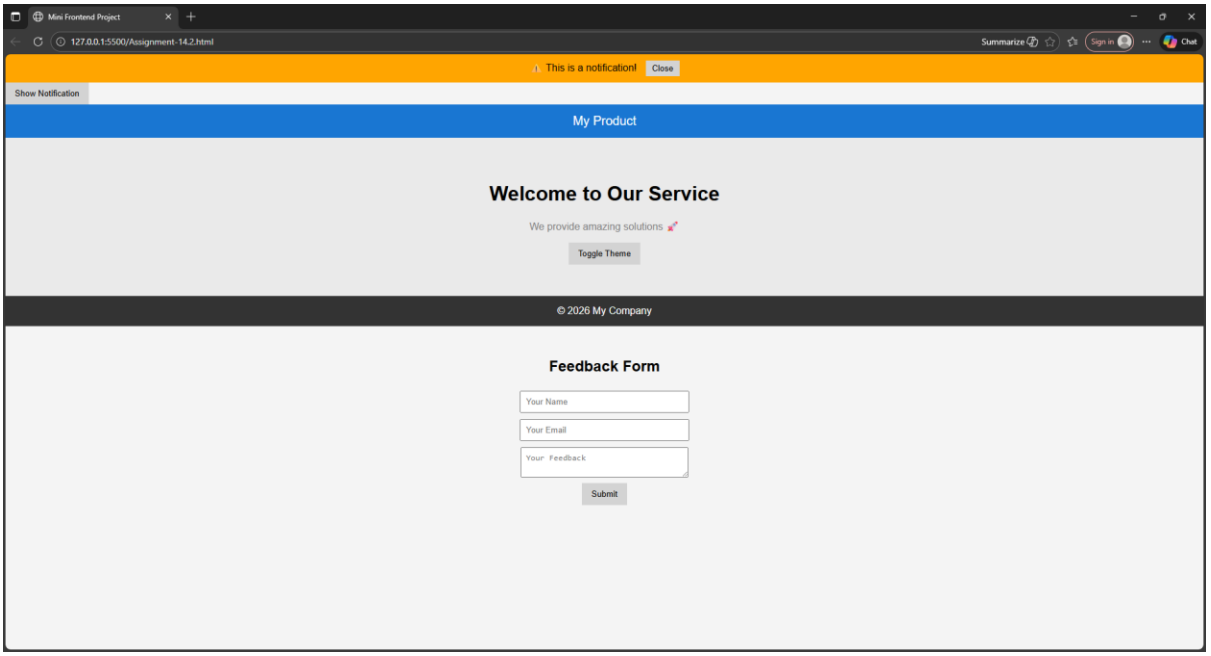
"Create a theme toggle button using JavaScript and ensure

good color contrast for accessibility."

-->

CODE:





OBSERVATION:

Clicking the button quickly switches between light and dark themes. This makes the page easier to use for everyone, and the smooth transition gives a modern, polished feel.

TASK-3:

PROMPT:

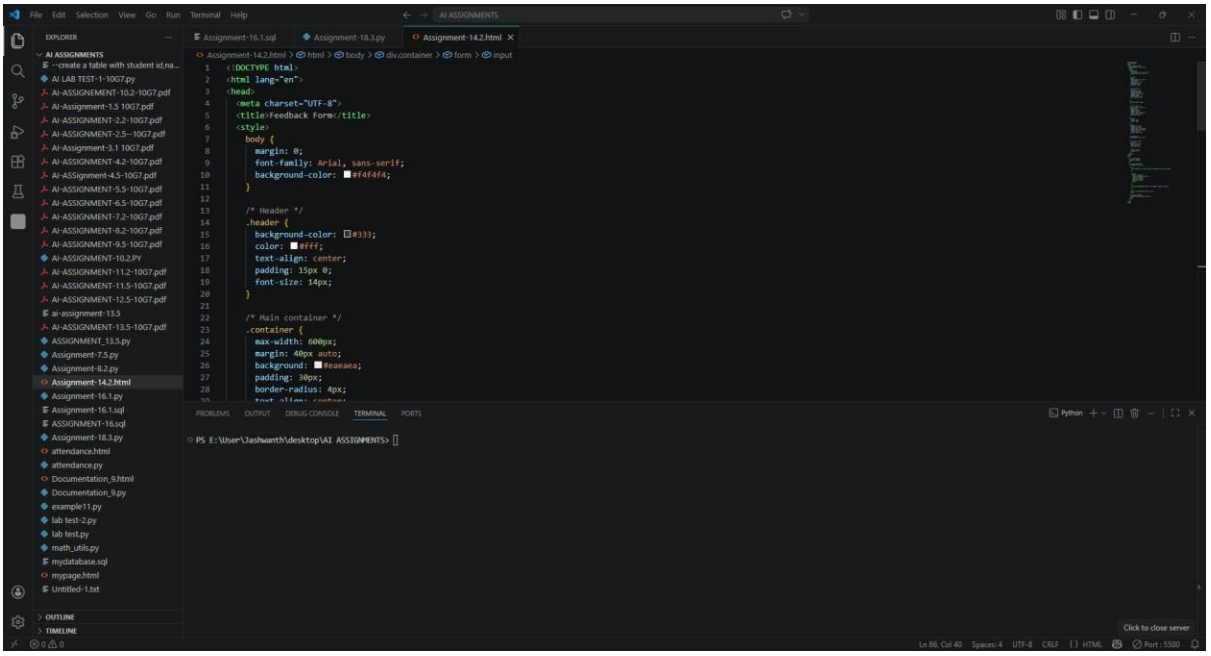
<!-- AI Prompt:

"Create a feedback form with validation and dynamic

success/error messages using JavaScript."

-->

CODE:



OBSERVATION:

The form checks that all required fields are filled before submission. If something is missing, it shows a clear error message, and if everything is correct, it shows a success message. This makes the form more user-friendly and prevents mistakes.

TASK-4:

PROMPT:

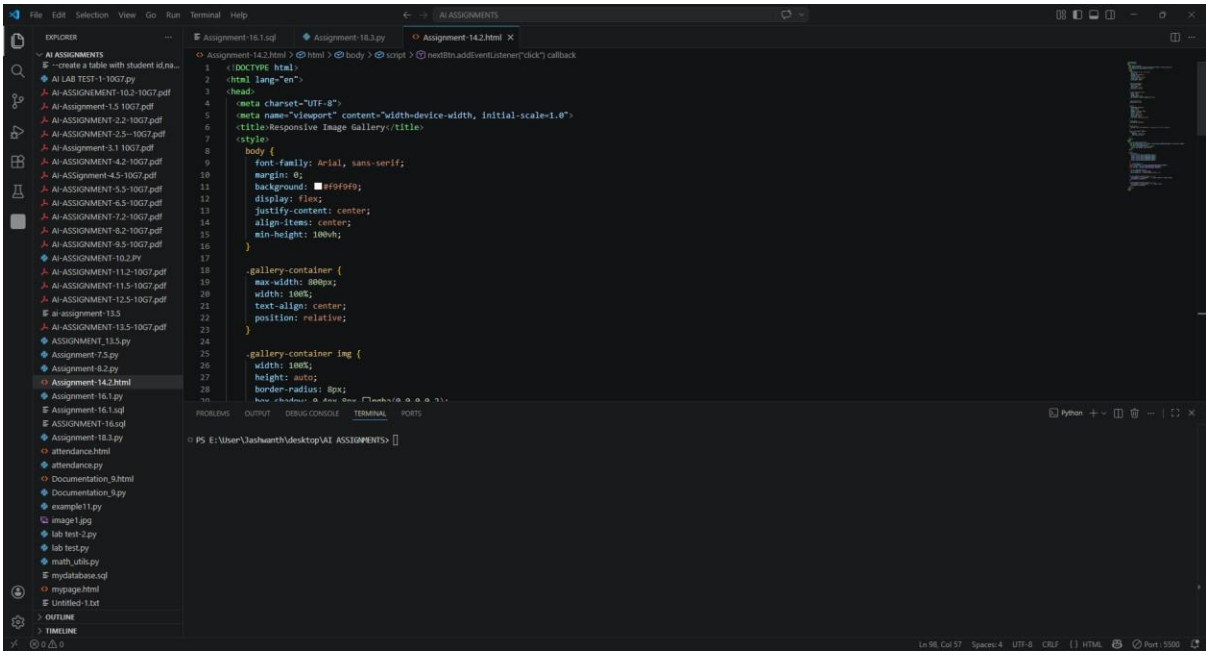
<!-- AI Prompt:

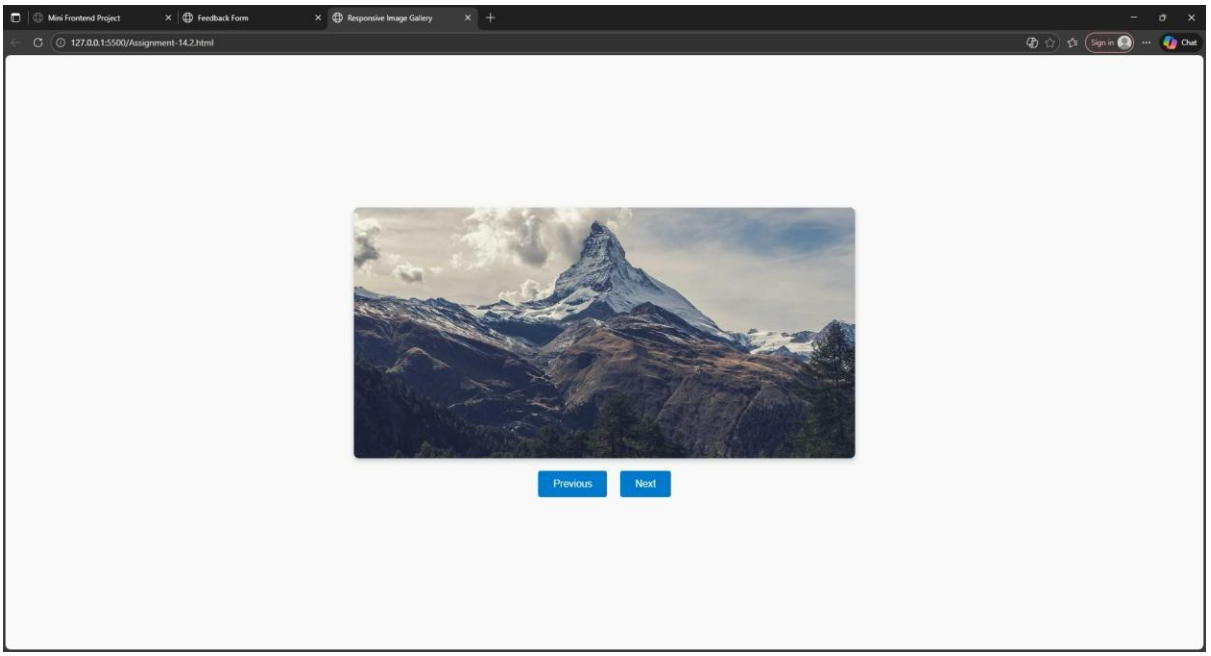
"Create an image gallery with next/previous buttons using

JavaScript and make it responsive."

-->

CODE:





OBSERVATION:

The gallery lets you move through pictures using next and previous buttons. It works well on both computers and phones, making it easy and enjoyable to browse images.

TASK-5:

PROMPT:

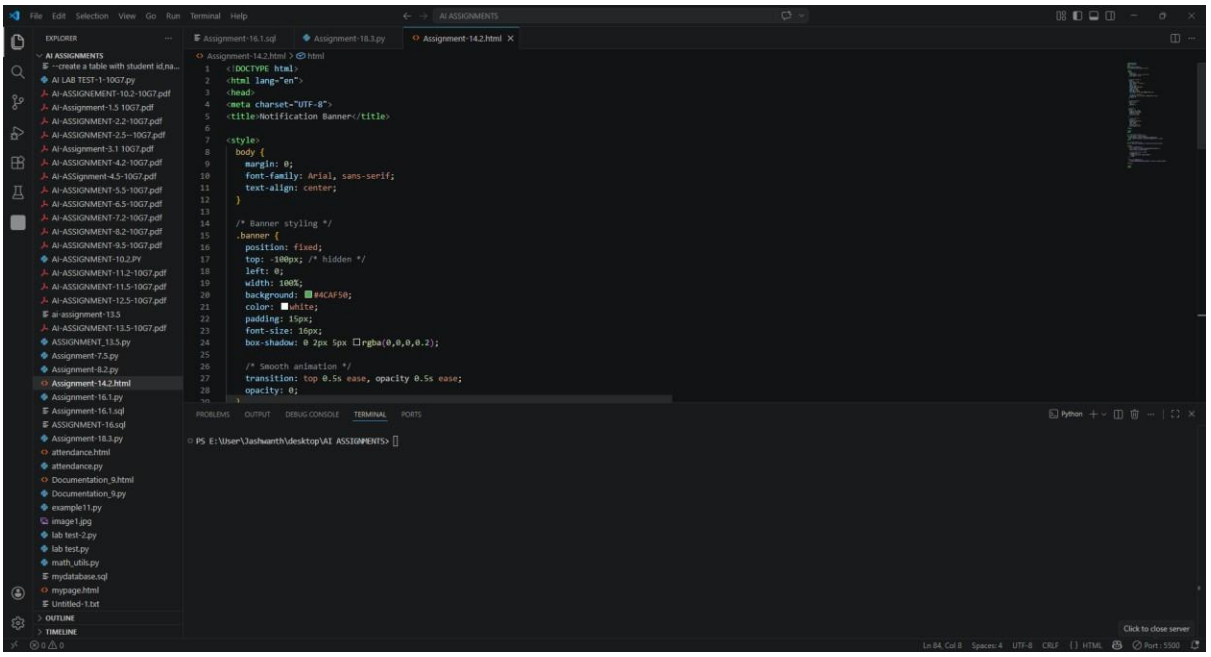
<!-- AI Prompt:

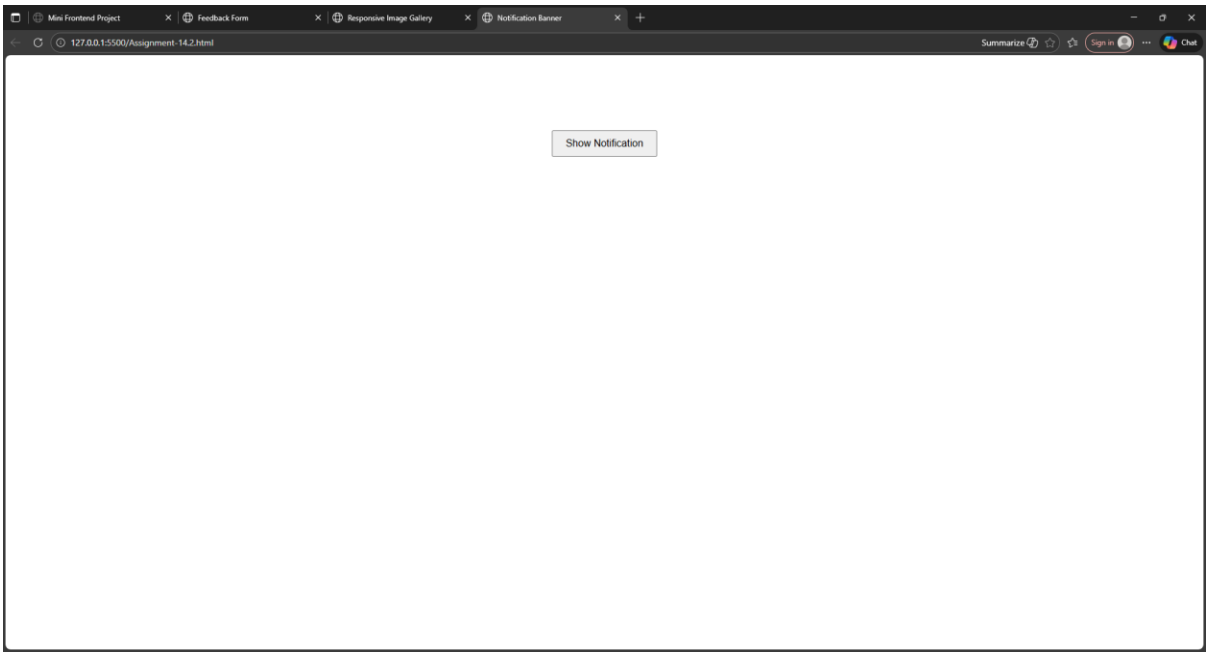
"Create a notification banner with smooth show/hide

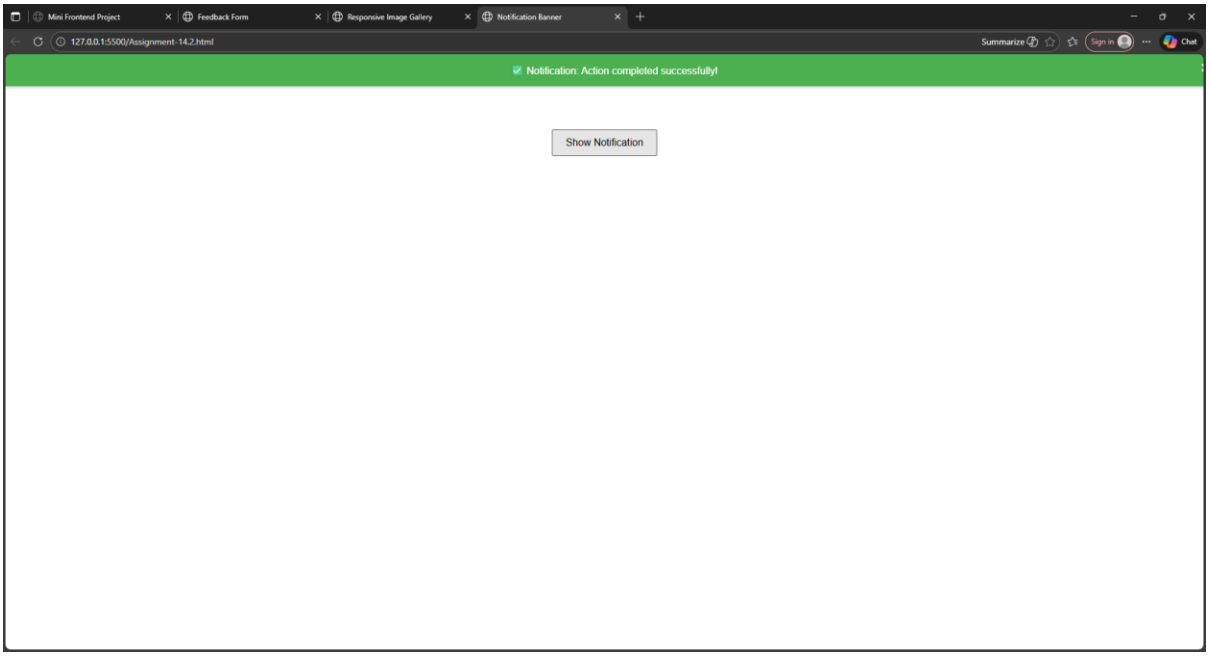
animation using JavaScript and CSS."

-->

CODE:







OBSERVATION:

The banner appears smoothly at the top of the page when triggered and hides again when dismissed. The animation makes it feel polished, and it’s a handy way to show alerts or announcements without interrupting the rest of the page.
